

FEDERAL BUYER'S GUIDE

Reach D9Tech through AWS

JWCC delivery and the AWS Think Big for Small Business partnership.

UEI	CAGE	AWS STATUS	DELIVERY
NB83NPJEHLF4	74S33	Select Tier Partner · Think Big for Small Business	Commercial & GovCloud, up to IL6

Beyond the federal vehicles, agencies can reach D9Tech's cleared engineers **through AWS**. D9Tech is an AWS Select Tier Partner and a member of the AWS Think Big for Small Business program, and supports AWS Professional Services and AWS partners directly — including work delivered under AWS's position on the Department of Defense's Joint Warfighting Cloud Capability (JWCC).

WHAT IS JWCC?

- **The DoD enterprise cloud vehicle.** Joint Warfighting Cloud Capability is a multiple-award IDIQ (ceiling up to \$9B) awarded by DISA in December 2022 to AWS, Google, Microsoft, and Oracle, with orders through December 2027.
- **All classification levels.** JWCC delivers commercial cloud at the unclassified, secret, and top-secret levels — from the enterprise to the tactical edge — available DoD-wide.
- **Where D9Tech fits.** AWS is the JWCC cloud provider; D9Tech supplies the cleared engineering that builds, secures, migrates, and authorizes (RMF / ATO) those mission workloads on AWS.

THE AWS PARTNERSHIP — THINK BIG FOR SMALL BUSINESS

D9Tech participates in AWS's Think Big for Small Business program, AWS's public-sector program supporting small, veteran-, and minority-owned partners with business, technical, and go-to-market enablement. In practice:

- **Bring an opportunity to AWS, and AWS can support it** — technical resources, funding, and go-to-market backing behind the pursuit.
- **AWS can also help D9Tech take the work on** — including teaming where AWS provides the enterprise cloud and D9Tech delivers the cleared engineering, or steps in to support delivery if needed.
- **One team, two strengths** — the buyer gets AWS's enterprise cloud backing plus a cleared, credentialed small-business engineering bench.

HOW TO ENGAGE D9TECH THROUGH AWS

- 1 **Through your AWS account team or AWS ProServ.** Bring D9Tech in as the cleared delivery partner on the engagement you are standing up.
- 2 **Through JWCC.** Order cloud from AWS under JWCC; D9Tech delivers the engineering, security, and ATO support on top.
- 3 **Through a federal vehicle, when a contract action is needed.** Pair the AWS engagement with 8(a) STARS III or OASIS+ (see those one-pagers).

WHY D9TECH ON AWS

- AWS Select Tier Partner with cleared engineers across cloud, security, AI/ML, DevSecOps, and data — up to TS/SCI.
- Commercial and GovCloud delivery up to IL6, including an AWS Yellow Badge GenAI engineer working in GovCloud.

Note: JWCC is held by AWS as a DoD cloud provider; D9Tech delivers as an AWS partner and is not itself a JWCC awardee. AWS, AWS GovCloud, ProServ, Think Big for Small Business, and JWCC awardee status are attributes of Amazon Web Services.
